We had a real fine response from cattle owners signing up to vote in the up coming beef referendum. There were 7 Appomattox cattle owners filing a certification form.

Those signing up will receive a ballot between April 1 and April 15. We urge you to vote and return your ballot immediately.

An attempt will be made to organize a regional Angus Association on Wednesday, April 2 at the Greensville County Ruritan Club House near Emporia, Virginia. Interested Angus cattlemen are encouraged to attend. There will be a beef barbeque at 7:00 p.m. and a business meeting at 8:00 p.m. The meal will cost $3.00.

• • •

This spring there will be 22 organized spring sales compared with 14 last year. Cattle numbers are also up - there will be 24,000 offered this year compared with 17,000 a year earlier.

• • •

Speaking of beef, any one feeding DES to cattle on a day to day basis must withdraw cattle 14 days before slaughter. This doesn't pertain to the stilbestrol implants - I don't believe we have anyone feeding DES in this area.

• • •

The sheep population is going up in Virginia. Any one interested in purchasing some Western replacement ewes should get their orders in now. Five Virginia sheep producers have ordered replacement ewes for sale in Virginia this spring. They will arrive no later than May 15.

• • •

Appomattox Dairymen will form a county organization April 15, 7:30, Parkway Restaurant. All dairymen and persons interested in dairying are invited to participate in this dutch treat affair. Wives are always invited.

• • •

Tillman white clover is more productive and disease resistant than ladino clover. The seed are higher. It will cost approximately 40c more per acre, but this is a low cost investment when you consider the values.

• • •

Kenstar red clover seed will be available next spring. Be on the lookout for this new high yielding variety with a much longer life than our old varieties. You can expect it to stay in three or more years.

• • •

If you are seeding orchard grass with red clover - you should try some of the new Jackson orchard grass. It heads out about 10 days later than conventional varieties. Seed are available this spring.

• • •

It is reported that Zineb and terbam will be in short supply this spring. Rohm and Haas will not manufacture any more of these materials, however Niagara will probably continue to manufacture zineb.

Either of these materials are effective against blue mold. Better get your supplies in hand.

• • •

Dacthal for weed control in gardens will only be available from 1974 stocks. The plant manufacturing this material was destroyed. Better look for some early supplies are extremely limited.

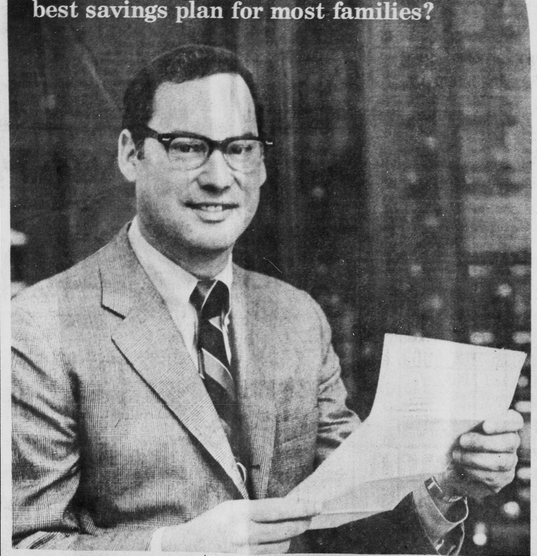
Do you know what I'd recommend as the best savings plan for most families?



James L. Davidson, President of First Federal Savings & Loan Association

Sure, First Federal has certificates paying better than 7% interest but I really believe that most people are best off with our one-year 6½% certificate.

You only need $1000 in savings to earn this excellent rate of interest—and most families should have at least that much in a safe, insured savings account.

If you want to put your money in a six-year certificate, First Federal can pay you 7¾% (which actually yields 8.06% annually because your interest is compounded) but most families don't want to tie their savings up that long. And interest on your one-year certificate is also compounded so it actually gives you over 6½% a year.

If you need your money before the year is up, you can always get it, although a new federal law requires that we charge a substantial interest penalty for early withdrawal.

Let's discuss what is best for you. My job as president of Central Virginia's largest savings & loan is helping families like yours get more for their money.
